NRB

0800/3600
only cooling

Air/Water chillers for outdoor installation
Scroll compressors, plate heat exchangers and axial fans
Cooling capacity 221 ÷ 1047kW

R410A

Variable Multi Flow

VMF

- **HIGH EFFICIENCY ALSO AT PARTIAL LOADS**
- **MICROCHANNEL COIL**
- **QUICK AND EASY INSTALLATION**
- **NIGHT MODE**

Characteristics

Outdoor chillers for the production of chilled water with high-efficiency scroll compressors, axial fans, microchannel condenser coils, plate heat exchanger. In the units (with desuperheater or total recovery) there is also the possibility of producing hot water for free. The base, the structure and the panels are made of steel treated with polyester paint.

Versions

NRB_°	Standard
NRB_L	Standard low noise
NRB_A	High efficiency
NRB_E	High efficiency low noise
NRB_U	Very high efficiency
NRB_N	Very high efficiency low noise

Range of operation: Work up to 50°C of outdoor air temperature at full load, depending on size and version. For further details refer to the selection software/technical documentation.

- Unit with 2 refrigerant circuits designed to provide maximum efficiency at full load, also ensuring high efficiency at partial loads and ensuring continuity in case one of the circuits stops
- The full range uses aluminium microchannel coils, ensuring very high levels of efficiency. This allows using less refrigerant compared to traditional copper coils.
- The possibility of using the electronic thermostatic valve brings significant benefits, in particular when the refrigerant is working at partial loads to the benefit of energy efficiency of the unit. It is supplied as standard from size 1800÷3600 optional for all other sizes.
- Electrical heater for plate heat exchanger
- Possibility of integrated hydronic kit that encloses the main hydraulic components; it is available in different configurations with one or two pumps, with different static pressures available
- Microprocessor adjustment, with keyboard and LCD display, for easy consultation and intervention on the unit via a menu available in several languages.

Adjustment includes complete management of the alarms and their log.

- The presence of a programmable timer allows setting time bands of operation and a possible second set-point
 - The temperature control takes place with the integral proportional logic, based on the water output temperature.
 - Night Mode: it is possible to set a silenced operation profile.
- Perfect for night operation, since it guarantees greater acoustic comfort in the evenings, and a high efficiency in the time of greater load.

Night Mode is standard on all low noise versions. For all other versions either the DCPX accessory or "I" inverter fan must be specified to allow Night Mode to operate.

Accessories

- **AER485P1:** RS-485 interface for supervision systems with MODBUS protocol.
- **AERWEB300:** Accessory AERWEB allows remote control of a chiller through a common PC and an ethernet connection over a common browser; 4 versions available:
AERWEB300-6: Web server to monitor and remote control max. 6 units in RS485 network;
AERWEB300-18: Web server to monitor and remote control max. 18 units in RS485 network;
AERWEB300-6G: Web server to monitor and remote control max. 6 units in RS485 network with integrated GPRS modem;

AERWEB300-18G: Web server to monitor and remote control max. 18 units in RS485 network with integrated GPRS modem;

- **PGD1:** Remote control of the chiller operating functions.
- **MULTICHILLER_PCO:** Control system for multiple parallel installed constant flow chillers providing individual chiller on/off and control capability.
- **DCPX:** Device for condensation temperature control, with continuous speed modulation of fans by using a pressure transducer.
Standard in option low noise version or with desuperheater.
- **AVX:** Spring anti-vibration mounts.

• **FL:** flow switch

Accessories factory fitted only

- **DRE:** Electronic soft starter which reduces starting current.
- **RIF:** Power factor correction. Connected in parallel to the motor allowing about 10% reduction of input current).
- **GP:** Coil guards
- **COMPATIBILITY with the VMF SYSTEM**
For more information on the system refer to the manual.

		AI	Pump I and buffer tank
		AJ	Pump J and buffer tank
			With n° 2 pumps and buffer tank: (5)(6)
		BA	Pump A with Stand-by pump and buffer tank
		BB	Pump B with Stand-by pump and buffer tank
		BC	Pump C with Stand-by pump and buffer tank
		BD	Pump D with Stand-by pump and buffer tank
		BE	Pump E with Stand-by pump and buffer tank
		BF	Pump F with Stand-by pump and buffer tank
		BG	Pump G with Stand-by pump and buffer tank
		BH	Pump H with Stand-by pump and buffer tank
		BI	Pump I with Stand-by pump and buffer tank
		BJ	Pump J with Stand-by pump and buffer tank

(2) The availability of models is to be agreed with the Technical Sales

(3) Sizes from 1800-3600 standard with the electronic thermostatic valve

(4) The motor condensing units are not configurable with option Y/X/Z

The models with total recovery "D/T" are not configurable with Y/Z and with vers. "C"

(5) All hydronic kit (from PA to BJ) are not compatible for the following sizes and versions with heat recovery "T":

- 0800 - 0900 - 1000 - 1100 versions "00"

- 0800 - 0900 versions "A"

- 0800 - 0900 versions "L"

(6) All hydraulic kit with pump / and buffer tank (from AA to BJ) are not compatible for all sizes and versions with heat recovery "T"
